Follet Access

What is Access?

The Access program is a NCC Bookstore initiative that delivers all required course materials digitally at the lowest possible price for certain courses at NCC, if you are enrolled in one of the courses you will see a charge on your student account for these digital books. This charge is a separate line item on your bill and is **not** part of your normal tuition charges and will look like the below on your student account.

Example: Book Fee: Hist 113G-02 American History - \$65

How to locate this on your Workday account: Finances/View Account Activity

The list of classes using Digital books (Follet Access) can be found below.

How does it work?

If your course is participating in Access you are automatically opted in and billed for these materials on your student account. Course materials will be provisioned to you via email from BryteWave or logging into Blackboard.

By participating in Access, you will receive a digital copy of your course materials on or before the first day of class at the lowest price available. **You are charged through your student account for these digital book fees.**

How do I opt out of the digital course materials and have the charges removed from my account?

Students will receive an email from the Follett Customer Portal and must follow the steps in the email if they choose to opt out. Students that opt out will see the book charge removed from their student account approximately 4 weeks after classes start.

Students who opt out will be responsible for sourcing the course materials on their own.

If a student drops a class during the 100% or 50% refund period, the book fee is immediately removed.

Spring 2024 Courses

Course	Access
